

Team 38 – Patient & Insurance Management System

Weekly Status 9/11/2023

CSCI-P465/565 (Software Engineering I)

Status for week ending 9/18/2023

Provide status for each project function, Deliverable, and/or software component under development.

****** For those teams using the more rigorous process, list the WBS elements that you worked this week, and the hours accordingly. ******

Elements of Weekly Status:

- **Project Function, Deliverable, Component Name**

List in this column all of the activities you performed with respect to your project during this week. Activities can be anything worked on the project: a document, a deliverable, a component of your system, time with the customer, planning/scheduling meetings, etc. Please be honest when reporting your status. For example, even if you are not yet supposed to be working on design per the process, please note a design activity if you did in fact work on the design that week - honest reporting will not adversely affect your grade.

- **Responsible Person**

Identify one (**and only one**) person on your team that is responsible for the activity that was performed. If two people worked a task, break the task up so that the contributions of each individual may be independently logged.

- **Man-Hours Worked this Week**

Indicate the how many man-hours (round to the 0.25 hour) were spent on the activity in the following process areas:

- Project Planning - Number of hours spent developing, documenting, and reviewing plans for the project
- Requirements Development - Number of hours spent developing, documenting, and reviewing the customer needs
- Design - Number of hours spent developing, documenting, and reviewing system and component design
- Implementation - Number of hours spent actually coding, peer reviews, and/or unit testing
- Test - Number of hours spent planning and executing the test

- Delivery - Number of hours spent packaging the product and/or developing the user manual
- Project Management - Number of hours spent developing weekly status, scheduling meetings, etc
- Change Control - Number of hours spent implementing and documenting changes to the baselined artifacts

- **Estimated Component Percent Complete**

For each identified component, indicate the estimated completion percentage

Project Function, Deliverable, or Component Name	Responsible Person	Man-Hours Worked this Week								Estimated Component Percent Complete
		Proj Plan	Req Dev	Design	Impl	Test	Deliv	Proj Mgmt	Chng Ctrl	
Microsoft Teams	Zane Ellis Snider	2	1	0	0	0	0	0	0	100%
Github	Sri Rashmitha Boya	2	1	0	0	0	0	0	0	100%
Jira board	Rishi Sanjaykumar Patel	2	1	0	0	0	0	0	0	100%
Project plan document, Customer meeting minutes, Weekly Status Report	Harshitha Nooli	2	1	0	0	0	0	1	0	100%
